

RasGas is one of the premier integrated liquefied natural gas (LNG) enterprises in the world. RasGas wanted to improve operational activity in its spare part inventory and Supply Chain.

Issues:

- Lack of real-time tracking of procured spares
- Unable to quickly ship out products to order specifications
- Poor material visibility and traceability
- Complicated goods receiving processes

Solution:

- Improved stock availability
 - Extended visibility of stock lead to better allocation of RasGas's products to clients
- Reduction in costly delays
 - Better spare part organization and stock due to full visibility and automated processes
- Integration into SAP
 - Saved time by taking away this manual task a worker use to do, and automating it
